

Most people who die in house fires are asleep.

Smoke puts you into a deeper sleep.

Working smoke alarms can save lives • Toxic smoke is a silent killer

If there is a fire, smoke alarms that work will be set off by the smoke.

They will wake you and your family so you can escape.

Smoke alarms that work can save lives.

put smoke alarms

Outside the bedrooms.

In the bedroom if you shut the door or if you are a heavy sleeper.

On every level of your house.

Put smoke alarms on the ceiling - away from fans and corners.

Do not put a smoke alarm in your kitchen - cooking may set it off.

looking after smoke alarms

Test smoke alarms once a month by pushing the test button.

Clean your smoke alarm once a month using a vacuum cleaner or soft brush.

Smoke alarms beep when their batteries are flat - change batteries every year.

Change smoke alarms every 5 to 8 years.

call your local fire station for help with smoke alarms.
